

The 5<sup>th</sup> International Conference on  
**Computing and Solutions  
in Manufacturing Engineering 2020**

October 7 - 10, 2020

Braşov - Romania

## Accepted Papers

The list is sorted alphabetically by the title of the paper

#	Title of paper	Authors
1	A brief review of numerical simulation in process machining	C I Malea, E L Nitu and M D Iordache
2	A comparative assessment of reliability indicators and parameters of the bearings using different estimation methods	C O Morariu and S M Zaharia
3	A review on biomechanics of the hallux valgus pathology and its surgical treatments	N F Cofaru and A H Brănescu
4	An approach regarding some performances of a FESTO pneumatic muscle actuator	I M Petre
5	Analysis of scheduling activities in the processes of improving surface characteristics of parts	M M Roşu, L Vlădăreanu and M Iliescu
6	Analysis of the influence on the hydraulic lifting circuit of the boom crane when the characteristics of the steel wire rope changes	Y Fei, J Jiang , and C Sun

7	Application of fractal theory in fault diagnosis of nonlinear mechanical equipment system: a review	X L Hou and X Wang
8	Aspects on applying experiential learning theory in engineering education. Case study – projecting prismatic parts	R Clinciu and M R Clinciu
9	Automatic generation of documents and reports for educational process	Cl Chivu and C Chivu
10	Avoiding workplace accidents in the industry by adapting training methods to the new technologies	P I Mureşan, I Miloşan, T Machedon-Pisu , D Senchetru and A N Reit
11	CAD based design for the jewellery industry: A case study	A Manavis, P Minaoglou, K Aidinli, N Efkolidis and P Kyratsis
12	Career transition through four personal drives – A cross-sectional analysis amongst healthcare, education and real-estate employees as a novel tactic in human resource development.	H Parameswaran
13	Comparison between aluminum alloys behavior in incremental sheet metal forming process of frustum pyramid shaped parts	G P Rusu, A Bârsan, M O Popp and A Maroşan
14	Comparison of the roughness of concave cylindrical surfaces machined with spherical milling cutters and toroidal milling cutters	A Osan, M Banica, L Butnar and V Nasui
15	Computational design technologies for interior designers: a case study	A Manavis, P Minaoglou, D Tzetzis, N Efkolidis and P Kyratsis
16	Computer program for single sampling plans by variables with known lot standard deviation	N Eftimie
17	Continuous improvement of the quality management system within an automotion company in Romania	M V Zerbes, L G Popescu, M Olteanu and A Olteanu
18	Current perspectives on innovative methods used in teaching technical drawing	M R Clinciu and R Clinciu
19	Designing of an original extruding system for 3D printing of parts made of plastic material in powder-state form	R Păcurar, S Pascu, A Păcurar, D S Stan, E Teuţan, D I Băilă and A Sadeh
20	Educational resource management by using virtual platform	C Gavrus, C Chivu and C I Chivu

21	Estimating the warranty returns and proving root causes using statistical analysis of archived parameters measurements for an automotive mechatronic device	I C Braga, R Udroi, A Nedelcu
22	Experimental research on dynamic thermal performance of silicon nitride all-ceramic ball bearings	S H Li, Y H Wang, C Wei, Z N Wang and Z X Xia
23	Fabrication and service of all-ceramic ball bearings for extreme conditions applications	S Li, C Wei and Y Wang
24	Fused deposition modelling process: a literature review	M Blaj and G Oancea
25	Generation of precessional gear teeth by plastic deformation	N Trifan, R Ciobanu and O Ciobanu
26	How can enterprises survive in Romania's present economic environment?	A M Ionescu and F A Sârbu
27	Influence of DC05 deep drawing steel real material properties on numerical simulation of incremental forming process	D Nasulea and G Oancea
28	Influence of process parameters on the AWJ cutting of the AL-EN AW 2017A (T4) aluminium alloy	M C Radu, C Schnakovszky, B A Chirita, N C Tampu, V A Ciobotariu and E Herghelegiu
29	Investigation of an axial hydrokinetic turbine with the CFD program FloSimulation	K Tuzharov, S Iliev, V Vilag and J Vilag
30	Key performance indicators for operational performance assessment in flexible packaging industry	C Cristea, M Cristea and D Ştet
31	Making Industry 4.0 functionalities understandable based on the production of a model car	S Roman and C Bunsen
32	Management of the human resources correlated to the sustainable road construction technologies	C M Niţu, D Căpăţină, M Iliescu and C Gasparotti
33	Mobile emergency notification apps: current state, barriers and future potential	R Repanovici and A Nedelcu
34	Moving object detection of assembly components based on improved background subtraction algorithm	K Zhang, S Tong, H Shi, G Yue and J Zhao
35	Multi-operative modular tool for cutting and mechanical hardening	D M Rosca and M Folea

36	Novel trend in case study of industrial robot programming and production system design using the virtual reality	R Holubek, R Ružarovský, K Velíšek and M Janíček
37	On-line linear guideway monitoring using laser mouse sensor	W N Cheng, C C Cheng, C M Tsai, B C Chang, W R Chen and T F Chiang
38	Optimization of industrial management processes	C Mărgineanu and D Lixăndroiu
39	Overall stability analysis of combined boom with telescopic main boom and fixed flying jib	S Liu, W Qin, X Han, and L Meng
40	Parameters setting of selective laser melting machine	D T Le and S L Chen
41	Performance diagnosis of the drive unit for high speed motorized spindle based on hidden state mapping model	Z W Jia, L T Fan, C X Zhu, Z P Si and J Z Liu
42	Prediction of radial clearance based on bearing vibration using artificial neural network	I Knežević, A Živković, M Rackov, Ž Kanović, A Buljević, M Bojanić Šejat and S Navalušić
43	Progressive screw shaft manufacturing technology	M Matejic, M V Dragoi, M Blagojevic, A C Filip and I Miletic
44	Research on reliable running time of motorized spindle based on health indicator	Z Si, L Fan, Z Jia and J Liu
45	Research on the study of the dimensional precision of the parts obtained by additive manufacturing	D C Anghel, A D Rizea
46	Robot-based incremental sheet forming – the tool path planning	A Bârsan, M O Popp, G P Rusu and A I Maroşan
47	Robotized application of assembly and soldering – case study	I Staretu
48	Selecting an alternative to solve a problem from several available alternatives	O Dodun, L Slătineanu, G Arcidiacono, M Coteaţă, G Nagiţ and A Hriţuc
49	Simulation research on pressure shock of load sensing system of large boom tower crane	Y Fei, J Li and C Sun
50	Some aspects regarding planetary precessional transmissions dynamics	I Bostan, V Dulgheru and I Malcoci
51	Static and dynamic characteristics analysis of self-balancing motorized spindle	Z Wang, W Z He, H M Zhou and S Y Du
52	Stress and vibration analysis of a drone	M Urdea

53	Studies on structural MWCNT/epoxy nanocomposites for EMI shielding applications	C Paun, C Obreja, F Comanescu, V Tucureanu, O Tutunaru, C Romanitan, O Ionescu, D E Gavrilă, V Manescu, V Stoica and G Paltanea
54	Study of input parameters influence on the surface quality at laser processing of Hardox 400 steel	C C Girdu, M V Dragoi, M Mileșan, L A Mihail, L Cirtina and C Radulescu
55	Study of milling machining roughness prediction based on cutting force	Y C Kao, S J Chen, T K Vi, G H Feng and S Y Tsai
56	Study of the deviation of shape for the parts obtained by additive manufacturing	A D Rizea, D C Anghel and D M Iordache
57	Study of the stator geometry for a Moineau pump	N Baroiu, G A Costin, G R Frumușanu, V G Teodor and N Oancea
58	Study on the application of CAM techniques on CNC lathes with Y axis and driven tools	R E Breaz, S G Racz, C E Girjob and M Tera
59	Study on the assessment and reduction of ergonomic risks in the construction field	A Ispășoiu, I Miloșan, D Senchetru, T Machedon-Pisu, C Meitță and A M F Ispășoiu
60	Study on vibration characteristics of motorized spindle based on multi-physics fields	K Zhang, Z N Wang, Z Wang, Q Y Wang and J Ma
61	Study upon the kinematic simulation of the incremental forming carried-on using a serial industrial robot	R E Breaz, S G Racz, C E Girjob and M Tera
62	Sustainable manufacturing systems – a simulation model	A L Parv, B A Deaky and R Stasiak-Betlejewska
63	Teaching online during the COVID - 19 crisis. Initial thoughts	B A Deaky, L Parv, V A Briciu
64	The determination of the relation between the drill diameter and the correction coefficient of the relative thickness of the drill core when calculating the axial force	R Daicu and V Dițu
65	The forming tool, primary start position and toolpath angle movement effect on the geometry accuracy "springback", part C	K I Abass
66	The heat treatment influence on microstructure and mechanical properties of TiAl6V4 parts manufactured by SLM	C Lancea, S M Zaharia, M A Pop and G R Buican

67	The methodology of economic recovery of commercial companies in crisis conditions	O Panazan, C Gheorghe and G Calefariu
68	The modelling of detached chip area at square shafts machining with rack tools	M Bordeanu, G Frumuşanu and N Oancea
69	The optimization of cutting parameters at turning, using electrical current at cutting, in order to increase the durability of the cutting tool	R Daicu and V Diţu
70	The simplified analysis method of nonlinear buckling and displacement of latticed structure	S Liu, W Yang, X Han and L Meng
71	Using critical path method for a new project scheduling - the case of a new product launch in production	F S Blaga, A Pop, V Hule, A Karczis and D Buzdugan
72	Voice frequency impact for voice control of collaborative robots	M Janíček, R Holubek, R Ružarovský and K Velíšek
